SYMMETRY AT WORK

Mr. Goh at KSI ASEAN Banking Summit

At the 2025 ASEAN Banking and Finance Summit, our founder, Mr. Peng Ooi Goh, took the stage alongside industry leaders to discuss a pressing question: How will digitalisation and AI reshape the future of banking and finance?

As technology continues to redefine customer expectations and operational efficiencies, the conversation underscored the need for financial institutions to embrace innovation while maintaining trust and resilience.

Adding to this momentous occasion, Silverlake is honoured to receive the ASEAN Banking Technology Excellence Award, a recognition of our commitment to driving digital transformation in the industry.

Cassandra Goh at Microsoft

For years, financial institutions have struggled with siloed operations—departments working in isolation, slowing down decision-making and innovation. At Silverlake, we saw an opportunity to change that.

Speaking at the Microsoft Cloud and AI Summit Malaysia, Silverlake's Group Chief Executive Officer, Cassandra Goh, highlighted how AI is transforming the way financial institutions operate. "Generative AI has helped break down silos, enabling better information sharing across departments and fostering a culture of innovation within our organisation," she shared. This shift isn't just about technology—it's about empowering teams, streamlining workflows, and unlocking new possibilities.

Recognising the evolving needs of financial institutions, Silverlake introduced CatgWorkz, an AI-powered solution built on Microsoft Azure. CatgWorkz is designed to help banks and financial service providers move beyond traditional inefficiencies by automating up to 80% of routine tasks. Combining AI with pre-configured templates, modular infrastructure, and seamless integration capabilities, it enables institutions to reduce costs while boosting productivity.

Silverlake at the Huawei Partner Event in Nairobi

At the Huawei Partner Event in Nairobi, industry leaders came together to explore how cutting-edge technology is reshaping financial services—and Silverlake was at the forefront of this transformation. Representing Silverlake, Gyorgy Ladics shared how we empower banks to stay ahead of the curve, delivering seamless, intelligent, and future-ready financial solutions that drive efficiency, security, and customer delight.

From Legacy to Intelligent Finance

Imagine a world where corporate payments happen in real time, trade finance is fully digitised, and SMEs access credit instantly with AI-driven scoring. That's the future we're building—with seamless cross-border trans actions, automated risk monitoring, and predictive cash flow analytics at the core.

Banking, Reimagined for People

Banking should be as effortless as a conversation. With omnichannel digital banking, AI-powered personalisation, and instant approvals for lending and deposits, customers experience banking on their terms—fast, intuitive, and secure.

Cloud-Native, AI-Powered, Future-Ready

Mobius II – A core banking engine designed for scalability, fintech integration, and real-time processing.

CatgWorkz AI – AI that doesn't just automate but elevates decision-making, risk intelligence, and customer engagement.

With regulatory shifts, cybersecurity challenges, and customer expectations redefining the financial landscape, Kenya's banking future is digital—and Silverlake is leading the charge. As a trusted partner, we empower financial institutions with resilient, future-proof solutions that unlock limitless possibilities.

IDC x Silverlake Roundtable in Jakarta

Indonesia's banking sector is at a pivotal moment, balancing rapid technological advancements with evolving regulatory demands. To navigate this transformation, Silverlake, in collaboration with IDC, hosted an exclusive Financial Executive Lunch Roundtable in Jakarta on 18th February 2025. The session brought together over 20 senior banking executives to discuss AI-driven transformation, regulatory compliance, and risk-managed growth. Dr. Ashish Kahar from IDC highlighted Indonesia's regulatory pivot to support financial growth, emphasising new AI regulations and financial inclusion as key industry priorities. As banks work to strengthen their infrastructure and overcome AI adoption challenges, Silverlake presented the top 10 AI use cases shaping Indonesian banking. Senior executives pinpointed fraud detection, spending analytics, scalability, and operational efficiency as critical areas for innovation.

A digital-first banking future demands modern, scalable core banking solutions that drive both resilience and growth. Ts. Dr. Othman Abdullah CPIF from Silverlake explains that a robust system is required to help banks manage millions of transactions on a daily basis. Silverlake remains committed to supporting financial institutions with cutting-edge solutions that streamline operations and facilitate seamless AI adoption. With new regulations taking shape and the shift to digital banking accelerating, the opportunity to redefine banking for Indonesia's fast-growing economy has never been greater.

Congratulations

Silverlake Transforms Banking with Cloud Migration: A Singapore Bank's Success Story

We've just completed a successful cloud migration for a leading niche challenger bank in Singapore, helping them transition from traditional infrastructure to a modern cloud environment. This transformation has modernised their technology stack, enabling greater scalability, faster deployments, and overall improved efficiency.

1. Migrated their database and systems to the cloud
2. Upgraded their technology stack with modern container architecture
3. Completed a seamless data migration to a cloud-based database system
4. Enabled faster deployments with a Continuous Deployment (CD) pipeline

We're proud of this accomplishment and ready to help more businesses transition smoothly to the cloud.

Strengthening Regional Collaboration

We were delighted to host Bank Islam Brunei Darussalam (BIBD) at Silverlake in Malaysia for an engaging discussion on market insights, digital banking innovation, and industry advancements. This visit underscores our shared commitment to driving financial transformation across the region.

We look forward to fostering stronger partnerships and shaping the future of banking together.
